

STATEMENT OF QUALIFICATIONS

Anza Resource Consultants (Anza) was established in January 2019 to provide high quality cultural resources consulting focused on efficient compliance with the California Environmental Quality Act (CEQA), CEQA-Plus, National Environmental Policy Act (NEPA), National Historic Preservation Act (NHPA), and other federal, state, and local laws, regulations, and ordinances.

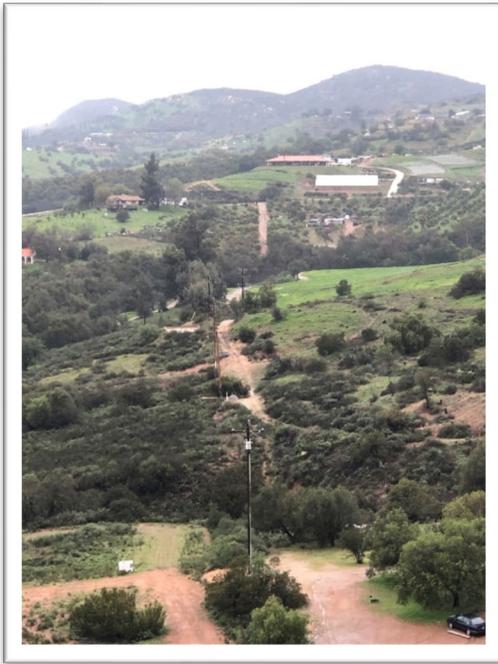

Northern California Power Agency Redding Airport Solar Project

Anza is headquartered in Oceanside, California, but conducts work throughout the state. We deliver cultural resources consulting services to local and state government agencies, and effectively aids planners and developers in complying with the cultural resources management regulations required for permitting. Specific services include:

- Cultural resources and archaeological constraints analyses (i.e., due diligence or “red flag” analyses)
- Cultural resources record searches
- Native American scoping and consultation assistance
- Field surveys (Phase I)

- Resource significance evaluation including National Register of Historic Places (NRHP), California Register of Historical Resources (CRHR), and local register eligibility evaluations. These include Phase II archaeological testing and built environment resource evaluation (Phase II)
- Archaeological data recovery programs (Phase III)
- Archaeological monitoring of ground disturbing construction (Phase IV)
- Geographic Information Systems (GIS) analysis
- Creative yet defensible mitigation strategies

Valley Center Municipal Water District Pipelines Replacement Program, San Diego County

Typical clients include local agencies such as cities, counties, and water districts; development and environmental planning firms; architecture and engineering firms; land developers; affordable housing developers; construction management and construction firms; and utilities.

For lead agencies, Anza's leadership has experience conducting third party review of applicant-provided studies; assisting agencies with Native American scoping and consultation as required by Assembly Bill 52 of 2014 and Senate Bill 18 of 2004; conducting cultural resources studies; and preparing sections of environmental documents such as initial study/mitigated negative declarations

(IS/MNDs), environmental impact reports (EIRs), environmental assessments (EAs), environmental impact statements (EISs), and joint documents such as EIR/EISs.

For applicants, Anza understands what a developer needs from a due diligence study, how the results of a cultural resources survey can impact the development opportunities of a given property, and how to assist these clients through the regulatory process as well as options regarding the potential for avoidance or treatment of known cultural resources. Like agencies, land developers may also need assistance with Native American consultation if resources important to Native Americans are identified or a project area is considered sensitive. Anza recognizes our role as consultants and helps these clients defensibly comply with laws, ordinances, regulations, and mitigation measures as efficiently as possible. Sometimes this involves the identification of the best

long-term solution and the ability to help our clients understand the options and their associated costs and timelines.

Anza specializes in **client-focused services**, especially for more complicated regulatory environments such as water districts getting funding assistance from the California State Water Resources Control Board (SWRCB), which may include money from the U.S. Environmental Protection Agency. SWRCB has established CEQA-Plus for such projects, which is essentially CEQA, NEPA, and Section 106 of the NHPA combined. CEQA-Plus cultural resources studies require review by the California State Historic Preservation Office (SHPO).

Similarly, cities or counties with road or bicycle/pedestrian trail projects may seek local assistance funding from the Federal Highway Administration as implemented by the California Department of Transportation (Caltrans). These projects require an expert who understands that the local assistance funding triggers a level of cultural resources reporting much greater than may be required for CEQA, and who can clearly explain the additional effort and costs associated with pursuing such funding. For example, if a project site is considered “sensitive” under CEQA, construction monitoring would not be adequate for SHPO approval under Section 106. A “sensitive” label would mean additional effort is required during the identification phase. Extended Phase I survey (i.e., exploratory excavation or vertical survey) may be necessary to determine the presence or absence of archaeological deposits, even in paved contexts.

Anza Team

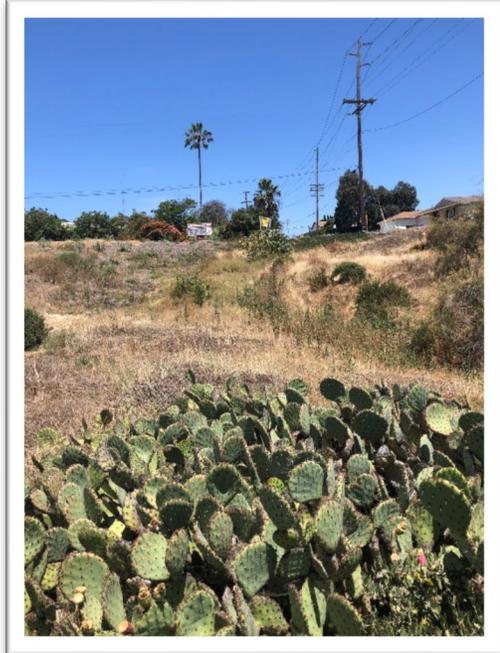

Anza was founded by Principal and Senior Cultural Resources Specialist Kevin Hunt, who has worked in resources management since 1990 and founded successful cultural resources consulting programs during previous employment. Ms. Katherine Collins, M.A., Registry of Professional Archaeologists (RPA), has more than 10 years of experience in cultural resources management and serves as Principal Investigator, Co-author, and Website Developer and Manager. Anza retains the services of experienced GIS specialists as well as a strong network of skilled and competent archaeological technicians in the event a project requires a large crew or efficiency can be achieved using local specialists. Anza’s leadership has mobilized crews as large as 30 people on short notice to successfully meet the demands of a project.

Kevin Hunt, Principal

Recent Projects

Since January 2019, Anza has provided cultural resources services on more than 20 projects throughout California. These projects were in San Diego, Imperial, Riverside, San Bernardino, Los Angeles, San Joaquin, Santa Clara, Alameda, Sonoma, Shasta, and Plumas counties, demonstrating Anza's ability to execute work in any part of the state. Market sectors included commercial and residential land development, renewable energy, water, and transportation infrastructure. Regulatory environments include CEQA, CEQA-Plus, and Section 106 of the NHPA for projects with U.S. Army Corps of Engineers, Federal Aviation Administration, U.S. Department of Housing and Urban Development, or U.S. Department of Agriculture permitting or funding. Anza is committed to satisfying the various regulatory requirements as efficiently as possible, with a focus on producing only what the client needs to achieve project goals and permitting.
